-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 09 April 2008.  
2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

Applicant's submission, filed 9 April 2008, has been entered and acknowledged by the examiner.

Applicant's arguments with respect to the rejections of the claims have been considered but are moot in view of the new ground(s) of rejection.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,4,6,7 are rejected under 35 U.S.C. 102(e) as being anticipated by Zukawa et al. (USPN 2004/0145314).

With regard to claim 1,

Zukawa et al. disclose in at least the figures and paragraph 29 a plasma display panel comprising: a front panel including a display electrode (102) a dielectric layer (106) and a protective layer (107) sequentially formed on a first glass (101) and a back panel (111) confronting the front panel and including an address electrode (112) a base dielectric layer (113), a barrier rib (115) and a phosphor layer (115) disposed to confront each other and being sealed at outer walls of the front panel and the back panel with a sealing member (190) so as to

Art Unit: 2879

form an inner space between the protective layer (107) of the front panel and the phosphor layer (115), barrier rib (114) and base dielectric layer (113) of the back panel, and a catalyst (200,201,202,217) provided on at least one of the base dielectric layer, the barrier rib, and the phosphor layer so as to be exposed to the inner layer space and react with a hydrocarbon existing in the inner space.

With regard to claim 4,

Zukawa et al. disclose the plasma display panel according to any of claim 1, wherein the catalyst accelerates oxidization of the hydrocarbon.

With regard to claim 6,

Zukawa et al. disclose the plasma display panel according to claim 1, wherein the catalyst accelerates decomposition of the hydrocarbon.

With regard to claim 7,

Zukawa et al. disclose the plasma display panel according to claim 6, wherein the catalyst is at least one selected from the group consisting of Co, Mn, Zn, Ti, TiO<sub>2</sub>, and Ni.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2879

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zukawa et al. (as above).

With regard to claim 5,

Zukawa et al. disclose the plasma display panel according to claim 4. While Zukawa et al. do not disclose the claimed catalyst, a catalyst selected from the group consisting of Pd, Pt, Rh, Co<sub>3</sub>O<sub>4</sub>, PdO, Cr<sub>2</sub>O<sub>3</sub>, Mn<sub>2</sub>O<sub>3</sub>, Ag<sub>2</sub>O, CuO, MnO<sub>2</sub>, CoO, and NiO was well known to those of ordinary skill in the art at the time of the invention for providing the decomposition disclosed by Zukawa et al. and therefore would have been obvious to try as a replacement for the disclosed catalyst.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
